

More sunlight. More possibility.

Solar panels selected around your space, your energy needs and the way you live and work.

THE RIGHT PANEL FOR YOUR PROJECT

LONGi offers solar technology for residential rooftops, commercial buildings and larger installations. Abelarti helps you explore the range and choose the panel that suits your property.

01 **At home**

Balance performance, available roof space and the appearance of your home.

02 **At work**

Consider daytime electricity use, roof layout and the needs of your business.

03 **Beyond the roof**

Explore options for larger sites and ground-mounted installations.

Product and application imagery supplied by LONGi.

Your project. Your panel selection.

A good choice starts with the whole installation. These are the details we consider together.

01 Your space

Usable area, orientation, nearby shading, roof structure and mounting requirements.

02 Your energy

Electricity consumption, when you use it, and plans for battery storage or EV charging.

03 Your panel

Suitable power, efficiency, dimensions, weight and appearance from the LONGi range.

04 Your documentation

The proposed panel, matching manufacturer datasheet, product warranty and separate power warranty.

Good energy starts with a conversation.

Tell us about your property and priorities. Have a preferred LONGi panel in mind? Include it in your enquiry.

Free assessment. No obligation.

Panel availability, specifications and warranty terms depend on the selected product and market. This overview is a selection guide; your proposal provides the exact product documentation.
